Warehousing & Storage

We offer local warehousing services here at Liverpool, with easy-in/out options.

The warehouse and handling facility is a little under 3 miles from Liverpool Port container terminal and is located on the main thoroughfare to both the M57, M58 & M62 motorways. We are able to handle all types of palletised cargo, containerised or otherwise, alongside hazardous goods. If you Import or Export cargo then the warehouse location offers great savings potential.

tial.

The warehouse operation is a little over 106,000 sq.ft. [9,900 sq.mtrs.] and has ample capacity to store and accommodate over 20,000 pallets, given the correct size, configuration and stocking density of cargo.

Liverpool still provides relatively inexpensive space options, although we see this changing over the coming year once the Port expansion begins to kick-in. More businesses will find themselves using Liverpool as a gateway, so it's time to move now, pick-up and lock-in to space whilst it's not at a premium!

Overseas Network

We also offer cost effective overseas warehousing solutions, as part of our commitment to our customers and our Supply Chain Solutions product offering. Relationships mean a lot to us, firstly as individuals but then also as a business, so providing we have an involvement in some way, should you require direct involvement with an overseas warehouse partner of ours then we are happy to make the introduction and step back; allowing you to build a direct relationship with our own chosen overseas suppliers.
